

I am a senior citizen. I chose my ISP because they are local and if I need help they are here to do so. This is a free country and we should be able to choose who we want to do business with. I am not in favor of the "Big Companies" telling who to do business with. They cannot help you on-line when you are already confused. I still like the personal home town touch. What about the people who will lose a job because of the "BIG BOYS" Tell the BIG BOYS to stay out of other people's business. I am very happy with my ISP. Now let the little guy who cares make his dollar. Thank you. June M. Pruitt
